

CREATE AND CONFIGURE IBM CLOUD SERVICES

Date	17 November 2022
Project Name	Project - IoT Based Smart Crop Protection System for Agriculture

CREATE A CLOUD OBJECT STORAGE SERVICE

•

The screenshot displays the IBM Cloud Object Storage creation interface. The browser address bar shows `cloud.ibm.com/objectstorage/create`. The page header includes the IBM Cloud logo and a search bar. The main content area is titled 'Cloud Object Storage' and includes links for 'Author: IBM', 'Date of last update: 2022-07-06 7:19 AM', 'Docs', and 'API docs'. Below the title, there are two tabs: 'Create' (active) and 'About'. The 'Create' tab shows a 'Choose an Infrastructure' section with two options: 'IBM Cloud' (selected, marked with a checkmark) and 'Satellite'. The 'IBM Cloud' option describes creating, managing, and accessing storage in globally available data center locations. The 'Satellite' option describes utilizing infrastructure from on-premise data centers or other cloud providers. Below the infrastructure selection, there is a 'Select a pricing plan' section. On the right side, a 'Summary' sidebar provides details: 'Cloud Object Storage' (Free), 'Region: Global', 'Plan: Lite', 'Service name: Cloud Object Storage-tn', and 'Resource group: Default'. At the bottom of the sidebar, there is a blue 'Create' button, an 'Add to estimate' button, and a link to 'View terms' to activate Windows. The Windows taskbar at the bottom shows the date as 17-11-2022 and the time as 08:22.

The screenshot displays the IBM Cloud Object Storage 'Buckets' management interface. The left sidebar contains navigation links for Cloud Object Storage, Storage instances, Cloud Object Storage-1i, Buckets (selected), Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main panel is titled 'Buckets' and features a search bar and a 'Create bucket' button. A descriptive paragraph states: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table listing existing buckets:

Name	Public access ⓘ	Location ⓘ	Storage class	Created
picture001	Yes	jp-tok	Standard	2022-11-16 4:15 AM

An 'Activate Windows' watermark is visible in the bottom right corner of the screenshot.
